

WP Photo Seller - How to Create a Photo Gallery

To Create a photo gallery click on “**Gallery**” link from WP Photo Seller Plugin’s Main menu.

Inside the “**Gallery Management**” page click on “**Create Gallery**” button.

It will take you to the “**Create/Edit Gallery**” page that looks like the following:

Gallery Settings

Gallery Name: This is the name of your gallery

Price List: Select a price list for your gallery or [create a new one](#).

Gallery Thumbnail Template: Choose the template style for displaying your gallery thumbnails [+ More Info](#)

Sort Order Of Gallery Images: Choose the sort order of your gallery images when they are displayed on the

Gallery Password: Enter a password here if you want to protect this gallery page. (Leave blank)

Preview Photo via Page: This setting will show previews of your photos on a separate photo details page instead of using a lightbox.

Enable Zoom This setting will enable zoom functionality on the photo details page. [+ More Info](#)

Enable Facebook Like Click this to display a facebook like button when displaying an individual photo.

Watermark Text: The text which you enter here will appear as a watermark on all photos in this gallery.

Watermark Text Opacity: Enter a value between 0 and 100 where 0 is most transparent and 100 is most opaque.

Watermark Text Placement: Choose the placement location of your watermark text

Watermarked Photo Width (px): Enter a desired width size [+ More Info](#)

Watermark Font Size (px): Set the font size of the watermark text [+ More Info](#)

Use Pagination: Click this to enable pagination when displaying your gallery's photo thumbnails.

Thumbs Per Page: Set the number of thumbnails to display per page

Upload Images: To upload or select your images from the media library please click this button

Enter the name of the gallery in the “**Gallery Name**” field.

If you have already created Price Lists then you will be able to select one from the drop down Price Lists. You can still create a Gallery without Price List and add it later. However, you won't be able to sell photos without creating a price list.

If you want to add Watermark to your gallery images then enter the info or text (e.g. Company Name, Contact Info etc) in the “**Watermark Text**” field or leave the text field empty if you don't want to use Watermark on your gallery images.

Optionally, select the other options that you want to enable or disable for this gallery.

Now click “**Upload**” button to select the images to insert into the gallery. You can upload photos from your Hard Drive or Media Library.

Once you have added all the images click “**Save Gallery**”.

For each gallery the plugin automatically creates a sub page under “Photo Gallery” and also display the galleries on the Photo Gallery page.

Inserting a Photo Gallery on Any WordPress Page

By default, the plugin will create a new page for you when you create a new gallery. However, you can embed the gallery on any WordPress post or page you want.

Lets say you have created a gallery whose ID is 1. You can simply put the following shortcode on any WordPress post or page to insert the gallery in that page.

```
[WPS_photo_gallery id="1"]
```

1 is the ID of the photo gallery that you want to insert in the page. You can change that with your own photo gallery ID.
