

WP Photo Seller – MailChimp Integration

With WP Photo Seller plugin you can easily integrate your MailChimp autoresponder account.

To integrate your MailChimp account with WP Photo Seller, go to the “**Settings**” menu from the plugin’s main menu.

From the “**Settings**” menu click on the “**Autoresponder Settings**” tab at the top.

Check “**Enable MailChimp Integration**” box to activate this option.

MailChimp Settings

Enable MailChimp Integration:
Check this if you want to signup your customers to your MailChimp list.

MailChimp List Name:
The name of the MailChimp list where the customers will be signed up to when using the global signup option (example: Customer List)

MailChimp API Key:
The API Key of your MailChimp account (can be found under the "Account" tab). By default the API Key is not active so make sure you activate it in your Mailchimp account.

Disable Double Opt-In: Do not send double opt-in confirmation email
Use this checkbox if you do not wish to use the double opt-in option. Please note that abusing this option may cause your MailChimp account to be suspended.

Do not send welcome email
Use this checkbox if you do not wish to send the welcome email sent by MailChimp when a user subscribes to your list. This will only work if you disable the double opt-in option above.

Signup Date Field Name (optional):
If you have configured a signup date field for your mailchimp list then specify the name of the field here (example: SIGNUPDATE). [More Info](#)

Enter your MailChimp list name that you want your customers to sign up to in the “**MailChimp List Name**” field.

Enter your MailChimp API key in the “**MailChimp API Key**” field.

Check the “**Disable Double Opt-In**” box if you do not wish to use the double opt-in option. If you check this option it will allow you to disable the welcome emails to the customers confirming their subscription to your list.

“**Signup Date Field Name**” field is optional if you have configured a signup date field for your MailChimp list.

Click the blue “**Update**” button at the bottom to save the details.
