

How to use the Manual Checkout Functionality of Photo Seller

WP Photo Seller plugin offers a manual or offline checkout functionality for your photos.

Manual Payment Settings

First we need to enable the manual payment feature. Go to **WP Photo Seller -> Settings -> Payment Gateway Settings** and select from the following options. Each option has a simple explanation to help you further choose one or both options.

1. **Use Manual Gateway Checkout:** Check this if you want to give your customers the option of paying by direct transfer or check by using a manual checkout
2. **Process manual checkout as if the payment was complete:** Manual checkout orders are kept in a pending state by default. Check this if you want to set the manual checkout orders to "Complete" when it comes in. This will deliver any download links immediately.

Manual Payment Settings

Use Manual Gateway Checkout: Check this if you want to give your customers the option of paying by direct transfer or check by using a manual checkout

Process manual checkout as if the payment was complete: Manual checkout orders are kept in a pending state by default. Check this if you want to set the manual checkout orders to "Complete" when it comes in. This will deliver any download links immediately.

If you don't want to provide both payment options **PayPal Checkout** and **Manual Checkout** in the dropdown menu as illustrated later on then make sure that you uncheck the following option **"Use PayPal Standard Checkout"**.

WP Photo Seller Settings

Main Settings Email Settings **Payment Gateway Settings** Autoresponder Settings Advanced Settings System Info

Paypal Settings

Use PayPal Standard Checkout: Check this if you want to use PayPal standard checkout

PayPal Email: Enter your PayPal seller email address.

How The Manual or Offline Checkout Works

Pot Plants

When you click on the gallery image item to purchase , the following is displayed.

You can add a **Qty** and then click on **Add To Cart**.
