# WP Photo Seller – Setting Templates for Photo Galleries

WP Photo Seller plugin has a few built-in templates to display your gallery images. By default **Template 1** is used to display all the gallery images.

You can choose the Template style when you create a new photo gallery or change the Template style by editing an existing gallery.

To change the gallery Template go to the **Gallery** menu from WP Photo Seller main menu.

From the **Gallery management** page's Existing Galleries list edit the gallery you want to change the Template for.

Under the **Gallery Settings** select the Template style from the drop down menu of the "**Gallery Thumbnail Template**" and save the gallery.

Gallery Settings

|	
Gallery Name:	Nature *This is the name of your gallery*
Price List:	Land Scape ▾ *Select a price list for your gallery or* create a new one.
Gallery Thumbnail Template:	Template 1 ▾ *Choose the template style for displaying your gallery thumbnails* + More Info
	Template 1
	Template 2
Sort Order Of Gallery Images:	Template 3 ▾ *Choose the sort order of your gallery images when they are displayed on the front end of your site*
Preview Photo via Page:	☑ *This setting will show previews of your photos on a separate photo details page instead of using a lightbox. The usage of this option is recommended.*
	Enable Zoom ☐ *This setting will enable zoom functionality on the photo details page.* + More Info
Gallery Password:	*Enter a password here if you want to protect this gallery page. (Leave blank to disable this feature)*
	+ More Info
